Where Smart Girls Become Intelligent Women

Ninth Grade Math Review – Summer 2020

To make sure you are prepared for Algebra next year, you will complete several assignments on Delta Math to review some 8th grade topics. Please read carefully below for the details.

1. Create an account by going to deltamath.com and clicking on Create Account, then click on Student. Use the login information that has been sent to your D.A. student email.

2. There will be two assignments for you to complete.
 - a. Summer Assignment #1 - due Saturday, August 1st at 8:00PM
 - b. Summer Assignment #2 - due Tuesday, September 1st at 8:00PM

You are strongly encouraged to start these problems in advance of their due dates. Do not save these assignments for the last minute. The purpose of completing these assignments is to give you the chance to review and feel confident with these topics before beginning the year in Algebra.

Suggestions: Write your work neatly on loose leaf paper so that you can keep it in your binder/folder next year for reference. Star the problems that you struggle with. Each question offers a detailed solution for you to follow and some of them offer a video tutorial--take advantage of these! Feel free to use the internet to help you refresh your memory with any of these topics. These will count as your first two homework assignments for the course. You will be graded on completion of both assignments by their due date. No late submissions will be accepted. The point deductions shown on Delta Math will not affect your grade. If you have any questions or concerns, please email Ms. Belcastro at jbelcastro@dominicanacademy.org.
